

How to Make Paper Dolls

A Craft from the 1900s

About a hundred years ago, kids created paper dolls out of their parents' mail-order catalogues. Now, you can too!

You will need:

Wooden stick – popsicle stick or stir-stick
 Paper dolls printout
 Tape (optional)

Directions:

1. Choose a person from your paper dolls printout and cut them out.
2. Cut two small horizontal slits in the middle of your paper doll and cut two identical slits below the first two.
3. Weave your popsicle stick through the slits.
4. If desired, secure your popsicle stick with tape. Have fun playing with your new doll!
